

§Appl. No. 10/688,887
Amdt. dated September 14, 2005
Reply to Office Action of, April 14, 2005

In the Specification:

Please amend the Specification as follows:

Page 5, the fourth full paragraph has been amended as follows:

A baffle 30 is located within the pit 15 and at a predetermined height within the pit. The baffle extends inwardly and has a central hole. A carrier 31 may rest on the baffle 30 and passes through the hole. As is clear in Figs. 1 and 2 the baffle 30 divides the filter pit 15 into an upper chamber 15A and a lower chamber 15B so as to separate filtered water from unfiltered water.
